

Briefly describe your experience with the M&S knowledge and skill set listed below. If you don't have experience in one or more of the six areas, please indicate by N/A. The CMSP Certification Board is looking for your overall experience and as such, not all the knowledge & skill set areas listed are required.

Ability to independently plan and lead complex M&S technical projects.	
Ability to conduct research broadly applicable to M&S.	
Ability to convey the level of confidence and/or risk associated with M&S-based findings.	
Capability to derive and specify high level and detailed requirements with measurable acceptability criteria.	
Demonstrated knowledge of the most current and up-and-coming technologies and methods related to M&S systems, including visualization, virtual and augmented reality, machine learning, and artificial intelligence.	
Demonstrated advanced knowledge of general M&S concepts and broadly applicable methods.	
Demonstrated ability to present M&S designs, implementation architectures, and results to other M&S professionals and to senior leaders.
