Core Activities

NATO School Oberammergau

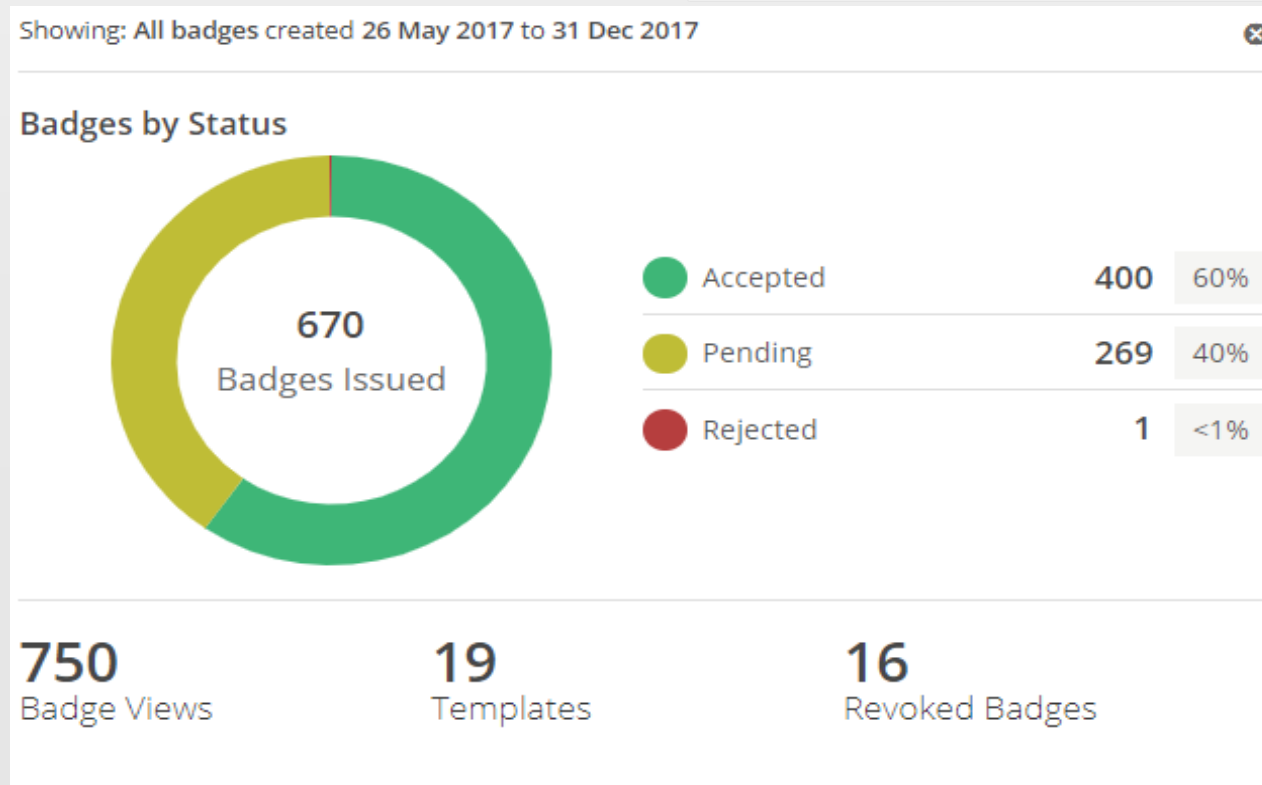

Digital Badge – Implementation phase

- Starting with summer of 2017 selected NSO courses started offering students the opportunity to claim a Digital Badge which can be shared on social media websites such as LinkedIn in addition to our traditional course certificate.
- NSO has partnered with Acclaim to offer students a new way to share and display their credentials.
- Each digital badge contains Metadata about what the recipient had to do to earn the Badge and is verified electronically by NSO.
- These badges can also be linked to your personal websites, email signature blocks, and other web based areas.

NATO School Oberammergau – Digital Badge Pilot Project

- 10 Resident courses
- 670 Digital Badges issued
- 60% Acceptance rate

NATO School Oberammergau – Digital Badge Pilot Project

NATO School Oberammergau

Located in southern Germany, the NATO SCHOOL Oberammergau (NSO) is NATO's premier facility for training and education at the operational level. NSO's curriculum has grown to more than 115 courses. NSO works closely with the NATO Command Structure to ensure training is relevant and timely, and developed and delivered in accordance with NATO's training doctrine and standards. Our digital badge program is the evolution of the recognition that we have provided to our students for more than 60 years.

Issued By [NATO School Oberammergau](#)

Blockchain

Publish your badge to the blockchain to create an immutable permanent record of your badge, which can increase third-party confidence in authenticity. Once recorded in a transaction on the blockchain, a reference to your badge will be accessible to the public for independent verification. Note: None of your personally identifiable information will be published to the blockchain.
