How do we create a vocational learning tool to identify reality and overlay information

Computer Vision & Machine Learning (XR) pros/cons

- (NON) Immersive
- xAPI/JSON suitable
- Interactive display vehicles optional
- NO High Resolution Lenses or Refresh Rate (fps)
- No language barriers
- Latency (lag) or NO motion sickness
- Lightweight, less muscle fatigue, less eye fatigue (non variable)
- If you can't "see" it, it still exists, objects and people can still be tracked

How do we create an educational learning tool to overlay information on reality

Augmented Reality (AR) pros/cons

- (NON) Immersive & Interactive display vehicles
- Wireless communication
- High Resolution Lenses
- No language barriers
- Latency (lag) or motion sickness (fps)
- Weight, some muscle & eye fatigue
- If you can't "see" it, it still exists

How does one go about creating a educational learning tool to celebrate the Apollo Program –

Virtual Reality (VR) pros / cons

- Immersive & Interactive display vehicles
- High Resolution
- No language barrier
- Latency (lag) or motion sickness (fps)
- Weight, muscle and eye fatigue
- Tethered by cables or wireless
- If you can't "see" it, it doesn't exist

Apollo 11
