TRL 3-6 high risk/ high reward test technology investigations for instrumentation prototype validation & capability risk reduction

- Nine **TEST** technology areas
 - Autonomy & artificial Intelligence
 - C4 and software intensive systems
 - Cyberspace Systems
 - Directed Energy
 - Electronic Warfare
 - Hypersonic and High Speed Systems
 - Space Systems resiliency
 - Warfighter cognitive/physical performance, TSPI-denied environments
 - Spectrum Efficiency for T&E range ops
- Funding Sponsor: OSD Test Resource Management Center (TRMC) Test & Evaluation/ Science and Technology (T&E/S&T) Program

ACQUISITION STRATEGY

- Dependent upon industry shaping of RFI responses
- Competition: Full and Open & Sole Source
- Multiple agencies anticipated

PERIOD OF PERFORMANCE

- Pilot program initiating in 1-2Qtr FY22
- >10 years; FY22-FY32
