Office Address

Growth Engine, Inc. 3788 Richmond Ave Houston, TX 77046

SBIR II, TACFI Small Business

The Problem

Creation	Consumption	Perception
 180 hours to develop 1 Hour of Corporate Training 5 months to develop 1 Online Course 120 to develop 1 Academic Class 18 - 36 months to develop DOD Training Course Multiple input sources 	 Employees Don't have time 80% of Training Content is forgotten within 30 days Content is irrelevant 	 Content lacks feedback Training is one sided top down approach Building training content is hard

The Al-Driven Process

Source Knowledge

Al Language Models

Adaptive Learning

Growth Engine automation features

The Automation

Text Parsing - Through Al-driven automation, new material can rapidly and easily be incorporated into course content on the LMS.

Automated Content Readability - Powerful readability algorithms, including the Flesch-Kincaid and Gunning-Fog. This provides a readability score, keyword density analysis, and a host of other essential stats.

Automated Parts Of Speech Tagging - The LMS delivers input material in the form of a course and tracks user interactions, including learner progress.

Automated Question Generation - NLU software analysis content and automatically generates multiple question types to use for student assessment.

Automated Course Builder - Learnecke's curricula generator automatically splits content into sections and subsections. Subsections can be included or excluded from training based on learner competency and goals.

Automate Identify student development opportunities - The system tracks metrics including % questions answered correctly per topic, repeatability of errors, time per section read, etc.

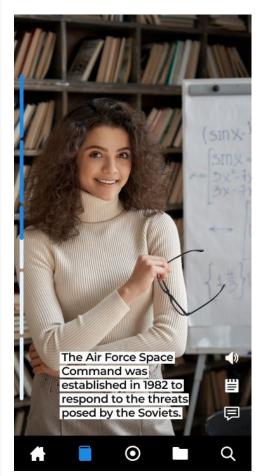

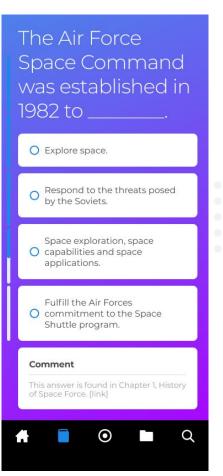

Enterprise Microlearning

- Short form video
- Learners can demonstrate knowledge
- AI models parse and understand content
- Comments analyzed for insight
