Brig Gen Thomas W. Harrell, USAF, Commander, 59th Medical Wing

Brig Gen Linell A. Letendre, USAF, Dean of Facility, U.S. Air Force Academy (USAFA)

About

This year's theme, *Training in a Digital World*, highlights the Department of the Air Force's drive to upskill personnel through digital training. The goal of the M&S Summit is to gather Air Force and Space Force M&S experts to learn about new M&S initiatives and techniques, network across military services and with industry experts, and to hear our technological leaders' perspectives on how M&S can transition more training from the real world to digital.

The 2024 DAF M&S Summit will provide a forum for shared information, ideas, and connection of M&S professionals across the DoD, industry, academia, and international partners. The three-day summit agenda includes: Eminent Keynote Speakers from Military, Government, and Industry Leaders | Distinguished Panel Discussions and Q&A sessions | Track Session Presentation Focus Areas | VIP Tour for Distinguished Visitors | M&S Industry Exhibition Hall | Classified M&S Briefing Sessions | M&S Tool Overview
